

From Electrostatic sanitization to enhanced cleaning techniques, Annett's Clean Care Program is our commitment to you to make sure your trip is clean, safe, and comfortable.

## COMMITTED TO CLEAN

**Every motorcoach is thoroughly cleaned and disinfected using CDC approved agents before and after every use.**

- ✓ Special focus on disinfecting high touch points such as entrance area handrails, parcel rack handrails and door latches.
  - \* Headrests, armrests, seat belts, seat accessories & windowsills
  - \* All surfaces in the restroom, including door handles
  - \* All surfaces within the driver's area

## ELECTROSTATIC FOGGING

**We're disinfecting areas using an electrostatic fogging machine.**

- ✓ When a bus returns to our terminal, our cleaning staff utilizes an electrostatic fogger with a CDC-recommended agent throughout the bus.
- ✓ On overnight trips, the same cleaning agent is applied with a handheld spray bottle to all high-traffic surfaces.

## BREATHE EASY

**Onboard air quality you can rely on.**

- ✓ All cabin air is completely exchanged with fresh, outside air about every 10 minutes.
- ✓ We are currently blocking the first two seats on the passenger side to allow social distancing for the group and the driver. We've also installed a clear plexiglass barrier directly behind the driver to block off the driver compartment from the group.
- ✓ We are in the process of installing a UV light in the air condenser compartments on each bus to aid in treating the air with the completion of this project by mid-2021.

## RIDE SMART

**Wearing a mask and Social Distancing**

- ✓ Annett drivers are required to wear a mask when loading & unloading passengers and when with the group before and after the trip.
  - \* While driving, in the interest of safety, we have encouraged drivers not to wear a mask to make sure breathing is not artificially restricted.
- ✓ Hand sanitizer dispensers are located at the front and rear of bus.
